# ADMS 2019 to Propel Defence Indigenization

It is a great privilege to welcome you all to the 6th edition of Aerospace and Defence Manufacturing Show (ADMS), India's premier aerospace and defence expo-cum-seminar, organized by Aeromag Asia in association with SIATI. Over the last five years, this annual event supported by Hindustan Aeronautics Limited (HAL) and Department of Industries, Government of Karnataka, has become one of the must-attend calendar events for aerospace industry stakeholders in India.

**Sunny Jerome**  
Managing Editor  
Aeromag Asia

ADMS has been providing an ideal platform for foreign and domestic companies in the Aerospace and Defence sector to showcase their top-notch defence technologies and products and interact with each other for promoting business. The event, started in 2014 with few exhibitors, has transformed into a major event with the participation of more than 80 organizations exhibiting in 105 stalls this year. Due to the space constraints, we could not accommodate few companies.

ADMS ensures an ideal interactive platform for public and private defence manufacturers, R&D institutions, academia, MSMEs and Startups under one roof to support India's indigenization drive in aerospace and defence manufacture. With the participation of prominent people representing Ministry of Defence, DPSUs, Armed Forces, DRDO, State Government, and Decision Makers in the industry, ADMS assumes significance as premier aerospace and defence event in India.

With prime focus on Indigenization and Strategic Partnerships in Defence Production, ADMS 2019 is all set to give a big boost to Make in India Defence. This year IAF, NAVY, ARMY, six Divisions of HAL, DRDO, ISRO, ECIL are exhibiting. Delegates and exhibitors are getting an opportunity to interact with the decision makers of armed forces and Defence PSUs at ADMS.

We would like to extend our sincere thanks to Department of Defence Production, Ministry of Defence, Govt. of India, Indian Air Force, Industries Department, Govt of Karnataka, Hindustan Aeronautics Limited, for their support to ADMS.

On the golden jubilee year of Indian Space Research Organization (ISRO), Aeromag is publishing a special issue as a tribute to the Indian Space Programme. The special publication will be released during ADMS 2019.

On behalf of the organizing committee, I extend a hearty welcome to all delegates, speakers, exhibitors, and other participants of ADMS 2019. I wish them happy deliberation and interaction for enhanced collaborations to help India achieve self-reliance in defence.

---

# SOLUTIONS FOR AEROSPACE INDUSTRY

Growel offers a large range of high quality tailor made products for surface treatment and coating processes for the Aerospace and Defence industries.

Growel is one of the very few Chemical & Engineering companies world over, capable of offering an integrated package of chemicals, paints, lubricants, plants, effluent treatment systems and waste recovery techniques from spent solutions.

The bouquet of products include conversion coatings on aluminum alloys & zinc plating, cadmium, chromium, nickel, zinc alloy plating, electroless nickel plating, epoxy primers, polyurethane topcoats and enamels for aircraft and missile bodies; marine paints for ships and offshore structures; metal working, rust preventive lubricants/coolants etc.

The company offers a wide range of specialized products suiting the needs of the industry and conforming to ASTM, GOST, AMS, MIL specs as well as specifications defined by OEMs.

Growel is proud to be the first Indian Surface Finishing Solution company to secure AS9100 Certification which is the quality management standard for the Aerospace industry.

MathWorks is the leading developer of mathematical computing software. Engineers and scientists worldwide rely on its products to accelerate the pace of discovery, innovation, and development.

**Major Products :**

MathWorks produces mathematical computing software for engineers, scientists, mathematicians, and researchers. MATLAB, the language of technical computing, is a programming environment for algorithm development, data analysis, visualization, and numeric computation. Simulink is a graphical environment for simulation and Model-Based Design of multidomain dynamic and embedded systems. The company produces nearly 100 additional products for specialized tasks such as data analysis and image processing.

Model-Based Design with MATLAB and Simulink is a modular development approach that enables engineering teams to move from internal research and development (IRAD) to design and implementation in a single environment. Companies are using this approach to:

- Mitigate program risk by sharing system specifications, analysis, and test data
- Reduce costly rework through early simulation of design
- Promote reuse by interfacing with existing tools, simulations, and legacy software
- Leverage new technologies by moving directly from IRAD to production
- Research emerging technologies such as Artificial Intelligence, Machine/Deep learning for signals and images, Predictive Maintenance

The Indian Navy is the naval branch of the Indian Armed Forces. The Indian Navy is a well-balanced and cohesive three-dimensional force, capable of operating above, on and under the surface of the oceans, efficiently safeguarding our national interests. The primary objective of the navy is to safeguard the nation's maritime borders, and in conjunction with other Armed Forces of the union, act to deter or defeat any threats or aggression against the territory, people or maritime interests of India, both in war and peace. Through joint exercises, goodwill visits and humanitarian missions, including disaster relief, Indian Navy promotes bilateral relations between nations.

**Navy Indigenisation**

The Indian Navy's foray into indigenisation began over five decades ago with the design and construction of warships in the country. The Indian Navy has embarked upon an initiative to evolve a guideline document, the "Indian Naval Indigenisation Plan (INIP) 2015-2030", to enunciate the need for developing various advanced systems for its platforms. This document supersedes the Indigenisation Plan published in 2008 for the period 2008-2022.

## INDIAN AIR FORCE

### NO. A1.10 & 1.11

#### Address :

Air HQ (RKP) West Block-6, 2ndfloor, Wing-7,  
RK Puram New Delhi- 110066

#### Contact Number :

011-23010231 Extn7992/7994

#### Web Address :

[www.indianairforce.nic.in](http://www.indianairforce.nic.in)

#### Contact Person:

C Indg O, Director / Joint Director

#### Profile:

The inventory of the IAF is wide and varied in terms of technology and origin. The maintenance of the war waging machinery ranging from vintage to state of the art technology is a challenging task. The rationale for extended use has always been based on life review study reports prepared by experts in the field in association with specialists. The DRDO, institutes under the CSIR, premier technical institutes and defence PSUs have been a source for specialist advice. The potential to maintain any equipment in operational condition is primarily dependant on product support. The rapid growth in technological advancements in the recent past has led to obsolescence at an equally faster pace. This has resulted in diminishing product support from OEM to sustain desired state of our weapon platforms and systems.

### Profile:

TEF-S KOATINGS (ISO 9001- 2015.)company was incorporated in 1995. It is an application process unit in surface coatings, Functional, Protective and decorative i.e. product finishing of different requirements with standard quality.

### Major Products :

- \* PTFE & FEP Mould release coatings
- \* PFA & PVDF coatings, HALAR coatings (Vessel, Tanks, Valves..)
- \* NYLON/RILSAN coatings ( Elc Insulations, Spline shafts)
- \* PVC coatings ( Chem Resistance)
- \* PLASTIC coatings
- \* POLYPROPYLENE Powder coating
- \* EPOXY & PU coatings
- \* UHMWPE powder coating
- \* FBE Coatings, PPS coating
- \* Pu Elastomer(Roller, Grippers) coating
- \* WS2 coating (most wear resistance)
- \* XYLAN (complete range) coatings
- \* POLYUREA coating (Defence,Const)
- \* DIP SPIN (PTFE & others), POM coating
- \* Al-Zn( Dacromet & Geomet) coatings
- \* PBI coating (replace galvanizing)
- \* Liquid Metal coating, Heat & Corrosion resistant coatings, MINI COMPONENTS Coating , PTFE (on rubbers-rings) coatings (perfect seals), PEEK coatings (Chem resistant ,Hard )
- \* NANO ( CERMER) coating , SOFT FEEL
- \* VELVET Coating, Crackle finish... On Various Substrate Surface - like all Metals , Plastics , Glass etc.

Thermo Fisher Scientific Inc. is the world leader in serving science, with revenues of more than \$20 billion and approximately 70,000 employees globally. Our mission is to enable our customers to make the world healthier, cleaner and safer. We help our customers accelerate life sciences research, solve complex analytical challenges, improve patient diagnostics, deliver medicines to market and increase laboratory productivity. Through our premier brands – Thermo Scientific, Applied Biosystems, Invitrogen, Fisher Scientific and Unity Lab Services – we offer an unmatched combination of innovative technologies, purchasing convenience and comprehensive services. The world's largest, most innovative cement producers rely on Thermo Scientific instruments to ensure product quality, improve plant profitability and operate safer, cleaner plants. We are the prominent provider in analytical spectroscopy, online elemental analysis, emissions monitoring instrumentation and tools for dynamic weighing and monitoring. Thermo Scientific is the product brand representing the world's leading analytical instrumentation. Regardless of plant size and age, we offer solutions to help you meet your needs. Whether your goal is improving efficiency of your existing plant, building a new plant from the ground up, expanding capacity, converting from wet to dry process or implementing a productivity solution in just one part of your plant, we can help.

**Major Products :**

- Thermo Scientific Niton XL2 100G XRF Analyzer
- Thermo Scientific Niton XL2 Plus XRF Analyzer

Electronics Corporation of India Limited is a Government of India Enterprise under Department Atomic Energy to address the Indigenous Electronic in the Country .ECIL is a multi product ,multi disciplinary Organisation providing technology solutions to users in Strategic Sectors such Defence, Nuclear , Aerospace, Security and IT & e Governance. ECIL has modern infrastructure for design, manufacturing and testing of equipment to beat the functional performance, reliability and quality requirements of products required for Strategic sectors.

### Major Products :

- RF Seeker
- Fazes
- Mission computer system
- Actuators
- Antenna Systems
- Jammers
- Control and Instrumentation systems
- Integrated Security System Including Video surveillance and Analytics
- Radio Communication Equipment
- Secure networking products
- Electronic Voting machines
- voter verifiable paper audit trail printers etc.

IPCL is a pioneer in the investment casting business in India, set up in 1975 under technical collaboration with overseas companies. IPCL is today the technology leader producing complex investment castings in a wide range of material specification and piece weight (Few grams to 200 Kg)

**Major Products :**

IPCL specialises in the manufacture and supply of ferrous and non ferrous investment castings (through air melting and vacuum melting) in fully machined and heat treated condition. We supply to sectors such as

- Automotive
- Defence
- EGR cooler/  
Emission systems
- Medical Implants
- Pump
- Locomotive
- Power  
Generation
- Atomic Energy
- Turbochargers
- General  
Engineering
- Aerospace
- Artisan Casting  
etc.
